§ 203.44

(ii) May 18, 2007, on a lease that is located entirely in water more than 200 meters deep.

[73 FR 69512, Nov. 18, 2008]

§ 203.44 What administrative steps must I take to use the royalty suspension volume?

- (a) You must notify the MMS Regional Supervisor for Production and Development in writing of your intent to begin drilling operations on all deep wells and phase 1 ultra-deep wells; and
- (b) Within 30 days of the beginning of production from all wells that would become qualified wells by satisfying the requirements of this section, you must:
- (1) Provide written notification to the MMS Regional Supervisor for Production and Development that production has begun; and
- (2) Request confirmation of the size of the royalty suspension volume earned by your lease.
- (c) Before beginning production, you must meet any production measurement requirements that the MMS Regional Supervisor for Production and Development has determined are necessary under 30 CFR part 250, subpart L.
- (d) You must provide the information in paragraph (b) of this section by January 20, 2009 if you produced before December 18, 2008 from a qualified deep well or qualified phase 1 ultra-deep well on a lease that is located entirely in water more than 200 meters and less than 400 meters deep.
- (e) The MMS Regional Supervisor for Production and Development may extend the deadline for beginning production for up to one year for a well that

cannot begin production before the applicable date prescribed in the definition of "qualified deep well" in §203.0 if it meets all of the following criteria.

- (1) The well otherwise meets the criteria in the definition of a qualified deep well in §203.0.
- (2) The delay in production occurred after reaching total depth in the well.
- (3) Production (other than test production) was expected to begin from the well before the applicable deadline in the definition of a qualified deep well in §203.0. You must provide a credible activity schedule with supporting documentation.
- (4) The delay in beginning production is for reasons beyond your control, such as adverse weather and accidents which MMS deems were unavoidable.

[69 FR 3510, Jan. 26, 2004, as amended at 69 FR 24054, Apr. 30, 2004. Redesignated and amended at 73 FR 69512, 69513, Nov. 18, 2008]

§ 203.45 If I drill a certified unsuccessful well, what royalty relief will my lease earn?

Your lease may earn a royalty suspension supplement. Subject to paragraph (d) of this section, the royalty suspension supplement is in addition to any royalty suspension volume your lease may earn under §203.41.

(a) If you drill a certified unsuccessful well and you satisfy the administrative requirements of §203.47, subject to the price conditions in §203.48, your lease earns an RSS shown in the following table. The RSS is shown in billions of cubic feet of gas equivalent (BCFE) or in thousands of cubic feet of gas equivalent (MCFE) and is applicable to oil and gas production as prescribed in §204.46.

If you have a certified unsuccessful well that is:

Then your lease earns an RSS on this volume of oil and gas production as prescribed in this section and $\S\,203.46$:

- (1) An original well and your lease has not produced gas or oil from a deep well or an ultra-deep well,
- (2) A sidetrack (with a sidetrack measured depth of at least 10,000 feet) and your lease has not produced gas or oil from a deep well or an ultra-deep well.
- (3) An original well or a sidetrack (with a sidetrack measured depth of at least 10,000 feet) and your lease has produced gas or oil from a deep well with a perforated interval the top of which is from 15,000 to less than 18,000 feet TVD SS.

5 BCFE

0.8 BCFE plus 120 MCFE times sidetrack measured depth (rounded to the nearest 100 feet) but no more than 5 BCFE.

2 BCFE.
